SUBJECT INDEX

- Accelerated deactivation test
Accelerated deactivation tests in
naphtha reforming 39
- Acidity control
Acidity control in alcohol dehydration
295
- Adsorption
Preparation and characterization of
very highly dispersed iridium on
 Al_2O_3 and SiO_2 353
- Adsorption
In situ preresonance Raman and optical
spectra of vanadyl
tetraphenylporphyrin adsorbed on
 $\text{Mo}/\text{Al}_2\text{O}_3$ catalysts 375
- Adsorption
Reactivity of oxygen chemisorbed on
supported Ni and Ni-Cu microcrystals
395
- Ageing
Dehydrogenation of methylcyclohexene
on a PtNaY catalyst. Study of kinetics
and deactivation 103
- Alcohol dehydration
Acidity control in alcohol dehydration
295
- Alcohol synthesis
Synthesis of alcohols from carbon
oxides and hydrogen. III. Cu-Mn-Ti-K
oxide systems: preparation,
characterization and catalytic
properties 161
- Aromatization
Reaction of ethanol and ammonia to
pyridines over zeolite ZSM-5 191
- Autocatalysis
Catalytic conversion of methanol to
hydrocarbons: autocatalysis
reconsidered 203
- Benzene hydrogenation
Effects of the interaction of
dispersed metal particles with the
support in catalysts prepared using
organometallic compounds. I. Influence
of ions of group IVB elements on the
properties of Pt/SiO_2 313
- Benzene hydrogenation
Effects of the interaction of
dispersed metal particles with the
support in catalysts prepared using
organometallic compounds.
II. (Pt + Pr)/ SiO_2 system 327
- Boron-molybdenum
Bimetallic boron(III)-molybdenum(VI)
catalysts as new model compounds in
the epoxidation of cyclohexene 285
- Butadiene hydrogenation
Bulk, surface and catalytic
characterization of the
 Co_3O_4 - La_2O_3 - LaCoO_3 system
339
- Butane hydrogenolysis
Influence of the crystallite size of
nickel on the course of the
hydrogenolysis of propane and n-butane
over Ni/ Al_2O_3 catalysts 47
- Butane oxidation
Kinetics and redox properties of
vanadium phosphate catalysts for
butane oxidation 211
- Carbon dioxide hydrogenation
Highly active catalysts for CO_2
methanation to provide the second
reactor of two stage process for high
BTU SNG synthesis 391
- Carbon monoxide adsorption
Preparation and characterization of
very highly dispersed iridium on
 Al_2O_3 and SiO_2 353
- Carbon monoxide hydrogenation
Effects of sodium, aluminium and
manganese on the Fischer-Tropsch
synthesis over alumina-supported iron
catalysts 141
- Carbon monoxide hydrogenation
Effects of the interaction of
dispersed metal particles with the
support in catalysts prepared using
organometallic compounds. I. Influence
of ions of group IVB elements on the
properties of Pt/SiO_2 313
- Carbon monoxide hydrogenation
Effects of the interaction of
dispersed metal particles with the
support in catalysts prepared using
organometallic compounds.
II. (Pt + Pr)/ SiO_2 system 327
- Catalyst characterization
Zirconium and titanium phosphates as
catalysts: a review 1
- Catalyst characterization
Acidity and catalytic properties of
zirconium phosphite 91
- Catalyst characterization
Synthesis of alcohols from carbon
oxides and hydrogen. III. Cu-Mn-Ti-K
oxide systems: preparation,
characterization and catalytic
properties 161
- Catalyst characterization
Kinetics and redox properties of
vanadium phosphate catalysts for
butane oxidation 211

Catalyst characterization

Simulated deactivation and regeneration of an industrial CoMo/gamma-Al₂O₃ hydrodesulphurization catalyst 227

Catalyst characterization

A study of the interaction of V₂O₅/TiO₂ (anatase) by high-resolution electron microscopy (HREM) 251

Catalyst characterization

Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode: application to Ir-Cu/Al₂O₃ catalysts 305

Catalyst characterization

Bulk, surface and catalytic characterization of the Co₃O₄-La₂O₃-LaCoO₃ system 339

Catalyst characterization

Preparation and characterization of very highly dispersed iridium on Al₂O₃ and SiO₂ 353

Catalyst characterization

Reactivity of oxygen chemisorbed on supported Ni and Ni-Cu microcrystals 395

Catalyst cracking

Modification of zeolite-containing cracking catalyst by WO₃/SiO₂ 277

Catalyst preparation

Zirconium and titanium phosphates as catalysts: a review 1

Catalyst preparation

Acidity and catalytic properties of zirconium phosphite 91

Catalyst preparation

Effects of sodium, aluminium and manganese on the Fischer-Tropsch synthesis over alumina-supported iron catalysts 141

Catalyst preparation

Synthesis of alcohols from carbon oxides and hydrogen. III. Cu-Mn-Ti-K oxide systems: preparation, characterization and catalytic properties 161

Catalyst preparation

Kinetics and redox properties of vanadium phosphate catalysts for butane oxidation 211

Catalyst preparation

Modification of zeolite-containing cracking catalyst by WO₃/SiO₂ 277

Catalyst preparation

Bimetallic boron(III)-molybdenum(VI)

catalysts as new model compounds in the epoxidation of cyclohexene 285

Catalyst preparation

Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode: application to Ir-Cu/Al₂O₃ catalysts 305

Catalyst preparation

Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. I. Influence of ions of group IVB elements on the properties of Pt/SiO₂ 313

Catalyst preparation

Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. II. (Pt + Pr)/SiO₂ system 327

Catalyst preparation

Preparation and characterization of very highly dispersed iridium on Al₂O₃ and SiO₂ 353

Catalyst preparation

Highly active catalysts for CO₂ methanation to provide the second reactor of two stage process for high BTU SNG synthesis 391

Catalyst preparation

Electrocatalytic synthesis of methyl formate and methylal from methanol on a platinum-bonded solid polymer electrolyte membrane 401

Catalytic cracking

Catalytic cracking of heavy vacuum gas oil 175

Cobalt-molybdenum/alumina

Simulated deactivation and regeneration of an industrial CoMo/gamma-Al₂O₃ hydrodesulphurization catalyst 227

Cobalt/lanthania

Bulk, surface and catalytic characterization of the Co₃O₄-La₂O₃-LaCoO₃ system 339

Coke formation

Accelerated deactivation tests in naphtha reforming 39

Coke formation

Acidity and catalytic properties of zirconium phosphite 91

Coke formation

Simulated deactivation and regeneration of an industrial CoMo/gamma-Al₂O₃ hydrodesulphurization catalyst 227

Coke formation

In situ preresonance Raman and optical

- spectra of vanadyl tetraphenylporphyrin adsorbed on Mo/Al₂O₃ catalysts 375
- Copper-manganese-titanium-potassium oxides
Synthesis of alcohols from carbon oxides and hydrogen. III. Cu-Mn-Ti-K oxide systems: preparation, characterization and catalytic properties 161
- Crystallite size
Influence of the crystallite size of nickel on the course of the hydrogenolysis of propane and n-butane over Ni/Al₂O₃ catalysts 47
- Cyclohexene epoxidation
Bimetallic boron(III)-molybdenum(VI) catalysts as new model compounds in the epoxidation of cyclohexene 285
- Dehydration
Acidity and catalytic properties of zirconium phosphite 91
- Dehydration
Acidity control in alcohol dehydration 295
- Dehydrogenation
Zirconium and titanium phosphates as catalysts: a review 1
- Dehydrogenation
Roles of potassium in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 65
- Dehydrogenation
Active phase in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 81
- Dehydrogenation
Dehydrogenation of methylcyclohexene on a PtNaY catalyst. Study of kinetics and deactivation 103
- Diffuse reflectance spectroscopy
Simulated deactivation and regeneration of an industrial CoMo/gamma-Al₂O₃ hydrosulphurization catalyst 227
- Diffuse reflectance spectroscopy
In situ preresonance Raman and optical spectra of vanadyl tetraphenylporphyrin adsorbed on Mo/Al₂O₃ catalysts 375
- Dispersed metal particles
Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. I. Influence of ions of group IVB elements on the properties of Pt/SiO₂ 313
- Dispersed metal particles
Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds.
II. (Pt + Pr)/SiO₂ system 327
- Electrocatalytic synthesis
Electrocatalytic synthesis of methyl formate and methylal from methanol on a platinum-bonded solid polymer electrolyte membrane 401
- Electron microscopy
A study of the interaction of V₂O₅/TiO₂ (anatase) by high-resolution electron microscopy (HREM) 251
- Epoxidation
Bimetallic boron(III)-molybdenum(VI) catalysts as new model compounds in the epoxidation of cyclohexene 285
- Ethane hydrogenolysis
Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. I. Influence of ions of group IVB elements on the properties of Pt/SiO₂ 313
- Ethane hydrogenolysis
Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds.
II. (Pt + Pr)/SiO₂ system 327
- Ethanol dehydration
Acidity and catalytic properties of zirconium phosphite 91
- Ethanol-ammonia aromatization
Reaction of ethanol and ammonia to pyridines over zeolite ZSM-5 191
- Ethylbenzene dehydrogenation
Roles of potassium in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 65
- Ethylbenzene dehydrogenation
Active phase in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 81
- Fischer-Tropsch synthesis
Effects of sodium, aluminium and manganese on the Fischer-Tropsch synthesis over alumina-supported iron catalysts 141
- Flow reactor
Highly active catalysts for CO₂ methanation to provide the second reactor of two stage process for high BTU SNG synthesis 391
- Fluidized-bed reactor
Catalytic gasification of rice hull. (II) The steam reforming reaction 27
- Heteroaromatization
Reaction of ethanol and ammonia to pyridines over zeolite ZSM-5 191

Hydrodesulphurization

Simulated deactivation and regeneration of an industrial CoMo/gamma-Al₂O₃ hydrodesulphurization catalyst 227

Hydrogen adsorption

Preparation and characterization of very highly dispersed iridium on Al₂O₃ and SiO₂ 353

Hydrogenation

Effects of sodium, aluminium and manganese on the Fischer-Tropsch synthesis over alumina-supported iron catalysts 141

Hydrogenation

Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. I. Influence of ions of group IVB elements on the properties of Pt/SiO₂ 313

Hydrogenation

Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. II. (Pt + Pr)/SiO₂ system 327

Hydrogenation

Bulk, surface and catalytic characterization of the Co₃O₄-La₂O₃-LaCo₃ system 339

Hydrogenation

Highly active catalysts for CO₂ methanation to provide the second reactor of two stage process for high BTU SNG synthesis 391

Hydrogenolysis

Influence of the crystallite size of nickel on the course of the hydrogenolysis of propane and n-butane over Ni/Al₂O₃ catalysts 47

Hydrogenolysis

Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. I. Influence of ions of group IVB elements on the properties of Pt/SiO₂ 313

Hydrogenolysis

Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. II. (Pt + Pr)/SiO₂ system 327

Infrared spectroscopy

Simulated deactivation and regeneration of an industrial CoMo/gamma-Al₂O₃ hydrodesulphurization catalyst 227

Iridium-copper/alumina

Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode: application to Ir-Cu/Al₂O₃ catalysts 305

Iridium/alumina

Preparation and characterization of very highly dispersed iridium on Al₂O₃ and SiO₂ 353

Iridium/silica

Preparation and characterization of very highly dispersed iridium on Al₂O₃ and SiO₂ 353

Iron oxide

Roles of potassium in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 65

Iron oxide

Active phase in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 81

Iron/alumina

Effects of sodium, aluminium and manganese on the Fischer-Tropsch synthesis over alumina-supported iron catalysts 141

Isomerization

Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode: application to Ir-Cu/Al₂O₃ catalysts 305

Isopropanol dehydration

Acidity control in alcohol dehydration 295

Kinetics

Roles of potassium in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 65

Kinetics

Dehydrogenation of methylcyclohexene on a PtNaY catalyst. Study of kinetics and deactivation 103

Kinetics

Kinetics and redox properties of vanadium phosphate catalysts for butane oxidation 211

Kinetics

Catalytic combustion of methane over various perovskite-type oxides 265

Kinetics

Bimetallic boron(III)-molybdenum(V) catalysts as new model compounds in the epoxidation of cyclohexene 285

Kinetics

Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode:

- application to Ir-Cu/ Al_2O_3 catalysts 305
- Köbel-Engelhardt synthesis
The Köbel-Engelhardt reaction over a silica supported nickel catalyst.
Variation of product distributions with reaction conditions 123
- Maleic anhydride
Kinetics and redox properties of vanadium phosphate catalysts for butane oxidation 211
- Mechanism
Reaction of ethanol and ammonia to pyridines over zeolite ZSM-5 191
- Methanation
Highly active catalysts for CO_2 methanation to provide the second reactor of two stage process for high BTU SNG synthesis 391
- Methane oxidation
Catalytic combustion of methane over various perovskite-type oxides 265
- Methanol conversion
Catalytic conversion of methanol to hydrocarbons: autocatalysis reconsidered 203
- Methanol dehydration
Acidity control in alcohol dehydration 295
- Methanol oxidation
Electrocatalytic synthesis of methyl formate and methylal from methanol on a platinum-bonded solid polymer electrolyte membrane 401
- Methylcyclohexene dehydrogenation
Dehydrogenation of methylcyclohexene on a PtNaY catalyst. Study of kinetics and deactivation 103
- Molybdenum/alumina
In situ preresonance Raman and optical spectra of vanadyl tetraphenylporphyrin adsorbed on $\text{Mo}/\text{Al}_2\text{O}_3$ catalysts 375
- Naphtha reforming
Accelerated deactivation tests in naphtha reforming 39
- Nickel
Catalytic gasification of rice hull. (II) The steam reforming reaction 27
- Nickel-cobalt/alumina
Highly active catalysts for CO_2 methanation to provide the second reactor of two stage process for high BTU SNG synthesis 391
- Nickel-copper/silica
Reactivity of oxygen chemisorbed on supported Ni and Ni-Cu microcrystals 395
- Nickel/alumina
Influence of the crystallite size of nickel on the course of the hydrogenolysis of propane and n-butane over Ni/ Al_2O_3 catalysts 47
- Nickel/silica
The Köbel-Engelhardt reaction over a silica supported nickel catalyst.
Variation of product distributions with reaction conditions 123
- Nickel/silica
Reactivity of oxygen chemisorbed on supported Ni and Ni-Cu microcrystals 395
- Oxidation
Zirconium and titanium phosphates as catalysts: a review 1
- Oxidation
Use of supported liquid-phase catalysts: palladium-lithium acetates on carbon 155
- Oxidation
Kinetics and redox properties of vanadium phosphate catalysts for butane oxidation 211
- Oxidation
Catalytic combustion of methane over various perovskite-type oxides 265
- Oxidation
Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode: application to Ir-Cu/ Al_2O_3 catalysts 305
- Oxidation
Reactivity of oxygen chemisorbed on supported Ni and Ni-Cu microcrystals 395
- Oxygen adsorption
Reactivity of oxygen chemisorbed on supported Ni and Ni-Cu microcrystals 395
- Palladium-lithium acetates/carbon
Use of supported liquid-phase catalysts: palladium-lithium acetates on carbon 155
- Perovskite-type oxides
Catalytic combustion of methane over various perovskite-type oxides 265
- Platinum-praseodymium/silica
Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. II. (Pt + Pr)/ SiO_2 system 327
- Platinum-rhenium/alumina
Accelerated deactivation tests in naphtha reforming 39
- Platinum/silica
Effects of the interaction of dispersed metal particles with the support in catalysts prepared using organometallic compounds. I. Influence

- of ions of group IVB elements on the properties of Pt/SiO₂ 313
- Platinum/solid polymer electrolyte membrane
Electrocatalytic synthesis of methyl formate and methylal from methanol on a platinum-bonded solid polymer electrolyte membrane 401
- Platinum/zeolite
Dehydrogenation of methylcyclohexene on a PtNaY catalyst. Study of kinetics and deactivation 103
- Polymerization
Zirconium and titanium phosphates as catalysts: a review 1
- Potassium ferrite
Roles of potassium in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 65
- Potassium ferrite
Active phase in potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 81
- Product characterization
The K  bel-Engelhardt reaction over a silica supported nickel catalyst. Variation of product distributions with reaction conditions 123
- Propane hydrogenolysis
Influence of the crystallite size of nickel on the course of the hydrogenolysis of propane and n-butane over Ni/Al₂O₃ catalysts 47
- Propylene oxidation
Use of supported liquid-phase catalysts: palladium-lithium acetates on carbon 155
- Raman spectroscopy
In situ preresonance Raman and optical spectra of vanadyl tetraphenylporphyrin adsorbed on Mo/Al₂O₃ catalysts 375
- Reduction
Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode: application to Ir-Cu/Al₂O₃ catalysts 305
- Regeneration
Simulated deactivation and regeneration of an industrial CoMo/gamma-Al₂O₃ hydrodesulphurization catalyst 227
- Regeneration
In situ preresonance Raman and optical spectra of vanadyl tetraphenylporphyrin adsorbed on Mo/Al₂O₃ catalysts 375
- Rice hull
Catalytic gasification of rice hull. (II) The steam reforming reaction 27
- Selectivity
Zirconium and titanium phosphates as catalysts: a review 1
- Selectivity
Catalytic gasification of rice hull. (II) The steam reforming reaction 27
- Selectivity
Influence of the crystallite size of nickel on the course of the hydrogenolysis of propane and n-butane over Ni/Al₂O₃ catalysts 47
- Selectivity
The K  bel-Engelhardt reaction over a silica supported nickel catalyst. Variation of product distributions with reaction conditions 123
- Selectivity
Effects of sodium, aluminium and manganese on the Fischer-Tropsch synthesis over alumina-supported iron catalysts 141
- Selectivity
Use of supported liquid-phase catalysts: palladium-lithium acetates on carbon 155
- Selectivity
Catalytic cracking of heavy vacuum gas oil 175
- Selectivity
Reaction of ethanol and ammonia to pyridines over zeolite ZSM-5 191
- Selectivity
Kinetics and redox properties of vanadium phosphate catalysts for butane oxidation 211
- Selectivity
Modification of zeolite-containing cracking catalyst by WO₃/SiO₂ 277
- Selectivity
Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode: application to Ir-Cu/Al₂O₃ catalysts 305
- Selectivity
Highly active catalysts for CO₂ methanation to provide the second reactor of two stage process for high BTU SNG synthesis 391
- Selectivity
Electrocatalytic synthesis of methyl formate and methylal from methanol on a platinum-bonded solid polymer electrolyte membrane 401
- Solid polymer electrolyte membrane
Electrocatalytic synthesis of methyl formate and methylal from methanol on

- a platinum-bonded solid polymer electrolyte membrane 401
- Steam reforming
Catalytic gasification of rice hull.
(II) The steam reforming reaction 27
- Temperature programmed desorption
Preparation and characterization of very highly dispersed iridium on Al_2O_3 and SiO_2 353
- Temperature programmed oxidation
Preparation and characterization of very highly dispersed iridium on Al_2O_3 and SiO_2 353
- Temperature programmed reduction
Preparation and characterization of very highly dispersed iridium on Al_2O_3 and SiO_2 353
- Titanium phosphates
Zirconium and titanium phosphates as catalysts: a review 1
- Transition metals
Zirconium and titanium phosphates as catalysts: a review 1
- Tungsten/silica
Modification of zeolite-containing cracking catalyst by WO_3/SiO_2 277
- Vacuum gas oil
Catalytic cracking of heavy vacuum gas oil 175
- Vacuum gas oil
Modification of zeolite-containing cracking catalyst by WO_3/SiO_2 277
- Vanadium pentoxide/titania
A study of the interaction of $\text{V}_2\text{O}_5/\text{TiO}_2$ (anatase) by high-resolution electron microscopy (HREM) 251
- Vanadium phosphate
Kinetics and redox properties of vanadium phosphate catalysts for butane oxidation 211
- Vanadyl tetraphenylporphyrin
In situ resonance Raman and optical spectra of vanadyl tetraphenylporphyrin adsorbed on $\text{Mo}/\text{Al}_2\text{O}_3$ catalysts 375
- X-ray absorption spectroscopy
Note on a dynamic study of a complete catalytic process by X-ray absorption spectroscopy in dispersive mode: application to $\text{Ir-Cu}/\text{Al}_2\text{O}_3$ catalysts 305
- X-ray diffraction
Bulk, surface and catalytic characterization of the $\text{Co}_2\text{O}_3\text{-La}_2\text{O}_3\text{-LaCoO}_3$ system 339
- X-ray photoelectron spectroscopy
Simulated deactivation and regeneration of an industrial $\text{CoMo}/\text{gamma-Al}_2\text{O}_3$ hydrodesulfurization catalyst 227
- X-ray photoelectron spectroscopy
Bulk, surface and catalytic characterization of the $\text{Co}_2\text{O}_3\text{-La}_2\text{O}_3\text{-LaCoO}_3$ system 339
- Zeolites
Dehydrogenation of methylcyclohexene on a PtNaY catalyst. Study of kinetics and deactivation 103
- Zeolites
Catalytic cracking of heavy vacuum gas oil 175
